-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1755

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 9 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5800926.

Claim 9 of the reference teaches a water repellant coating composition comprising tetraalkoxysilane, fluoroalkylsilane, alcohol solvent, oxalic acid and magnesium fluoride.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5800926, as applied above.

The difference between claim 9 of the prior art and instant claim 13 is the selection of acid employed. Comparative example 1 and Table 1 of the reference teach that the compositions of the reference may employ nitric acid with a small degradation of properties. While not as valuable as oxalic acid, Table 1 conclusively shows the usefulness of compositions using nitric acid. Absent evidence that the compositions of the instant invention including each of components A-D, using the acids of instant claim 13, exhibit properties the same as, or better than those using oxalic acid, it would have been obvious to substitute nitric acid for the oxalic of the claims because the reference teaches they are both useful for the intended application.

Art Unit: 1755

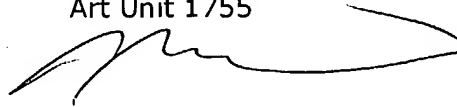

Claim 8 is rejected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 10, 11, 19 and 20 are allowable over the prior art of record. The prior art fails to teach or suggest compositions having each of components A-D in the proportions recited.
